EIGHT TRAPPED BY EXPLOSION IN PROVIDENCE

Chop Way Through Building to Escape Fire After Trolley Rams Tank

Providence, R. I., Jan. 19.—An automobile tank truck bearing several hundred gallons of gasoline was rammed by a street car at Mill and North Main streets. Gutters along one side of Mill street were flooded. Four stores and two dwellings were set afire, and eight people, trapped in one of the houses, escaped only after they had chopped a hole in a rear wall, when the gasoline exploded, sending a sheet of flame thirty feet into the air.

The truck, owned by Wilkinson & Company, and operated by William Jordan, had accidentally stalled across the car tracks. The trolley car, coming from the rear, could not stop before it crashed into the machine.

The tank was broken wide open and the gasoline poured out into the street, flooding the gutters for over a hundred feet. Passengers P. C. Ray and Thomas McCullough, passengers on the street car, got out instantly and stood guard to see that no one should inadvertently touch a match or cigarette butt into the fluid.

Some of the gasoline poured down a manhole in front of the Mill street station. In some manner the fire official cannot understand the gasoline in the underground main was ignited.

HOUSES CATCH FIRE

A tremendous explosion, which sent the iron manhole cover whirling a dozen yards away and shot flames high into the air, followed immediately. The entire side of the street was ablaze. Almost before the astonished spectators knew what had happened, the houses and stores which fronted on the sidewalk were caught.

The first house to burn was at No. 45 Mill street, occupied by Frank E. Stevenson, his wife and three small children, Harold, Ella and Hattie. On the upper floor lived Mary Christian and Mrs. Clara Brooks, with the latter's daughter, Rose, aged eight years.

The front of the building burned rapidly. All means of exit were instantly blocked. The women on the second floor made their way to the ground floor where they found Stevenson and his family unable to leave the little house, which had no rear door.

Stevenson seized an axe and hacked away at a rear wall, working feverishly as the flames ate their way towards the interior of the house. When he had succeeded in making a hole a few feet in diameter, the occupants of the house escaped.

\$150 IN WINE RUINED

Further down the street, at No. 33, a building occupied by Jakob D. Bachrach was burned. Bachrach is a tinsmith, but a quantity of sacramental wine, valued at \$1,500, was destroyed. A store at No. 33 Mill street, occupied by Joseph Silverman, another at No. 35, owned by Samuel Rosenblatt, a glass dealer, another at No. 22, occupied by Joseph Nathan, and a vacant building at No. 23, were either totally destroyed or badly damaged. Six other stores around the corner on North Main street, suffered losses to the stock through smoke and water.

LOMASNEY OPPOSES ATTACKS ON JUDGES

Representative Martin Lomasney arose in the House to enter upon a spirited defense of the Massachusetts judiciary, urging the legislators to think twice before entering the arena to attack on judges and blocked, temporarily at least, an order which would have been immediate proceedings against Judge Prescott E. Ryan of the Superior Court. Lomasney said he knew nothing of the charges against the judge, but that he feared adoption of the resolution might establish a dangerous precedent, which would open judges to political punishment for making decisions which did not meet the approval of citizens.

GRACE LOGUE'S BODY REMOVED TO MORGUE

Autopsy to Be Performed to Determine if Nurse's Death Was by Violence

The body of Miss Grace Logue, pretty nurse who was found last Christmas evening in a room in the apartment of Dr. Michael M. Stevens of Woburn, was removed today from the Glenwood Cemetery, Everett, to the North Grove street morgue. An autopsy to determine whether the nurse's death by violence will be performed by Dr. George H. Maynard. Death was pronounced due to an overdose of morphine, but members of the girl's family insist the girl was ill-treated before her death and demand that she be buried in her coat, as when she lay in her coffin. It was later decided to have an investigation that the body was exhumed.

PANAMA CITY WILL CONTROL OWN REVENUE

Panama, Jan. 19.—Control of the municipal revenues of this city by the national government of Panama, as outlined in a recent Presidential decree, has been unanimously rejected by the Municipal Council. The council held the decree was unconstitutional, asserting that the constitution guaranteed autonomy to the city of Panama.

ARCHBISHOP GAUTHIER OF OTTAWA IS DEAD

Ottawa, Jan. 19.—Archbishop Charles Hugh Gauthier of the metropolitan see of Ottawa died today after a lengthy illness. He was seventy-eight years old and one of the best-known Roman Catholic dignitaries in the Dominion. He was consecrated in 1911.

A CLEAR COMPLEXION

Ruddy Cheeks—Sparkling Eyes—Most Women Can Have
Says Dr. Edwards, a Well-Known Ohio Physician

Dr. P. M. Edwards for 17 years treated scores of women for liver and bowel ailments. During those years he gave to the world a prescription made of a few well-known vegetable ingredients mixed with olive oil, naming them Dr. Edwards' Olive Tablets. You will know them by their olive color.

These tablets are wonder-workers. They are a normal action, carrying off the waste and poisonous matter in your system.

If you have a pale face, yellow look, dark eyes, pimples, swollen tongue, headache, indigestion, constipation, all out of sorts, inactive bowels, you take one of Dr. Edwards' Olive Tablets every day. You will find them the most pleasant remedy.

Write for a free booklet and note the wonderful evidence for colonics and then just to keep them free, the one and only.

COAL

PRICES
We did NOT advance our prices in the Fall and are still selling at LOWEST SUMMER RATES.

PRICES NOW
Egg or Furnace - \$14.75
Stove or Nut - 15.00

If we reduce our price within 30 days of delivery to you, we will refund the difference on your order. No refund on deliveries after March 15, 1922.

QUALITY
We buy all our coal from the Lehigh Valley Coal Company, which we believe ships the best hard coal. Our coal is rechecked at the wharf and is free from dirt. Our coal is rechecked at the wharf so that we deliver the size ordered without other sizes mixed in.

SERVICE
If you are forwarded and avoid bad snow storms, we can make deliveries within 48 hours.

ASSETS
Our policies make satisfied customers. Our independence—we are not connected with any other coal company.

SAYS COUNCIL
FOR PUBLIC
UTILITIES
WATSON DECLARES IT WILL ACT
IN LIGHTING SITUATION
NEXT MONDAY

President James A. Watson of the Boston City Council today predicted that the Council at its next meeting on Monday will take the first definite step toward public ownership of the electric lighting situation in Boston. He said he felt the action of the Council will be unanimous.

Watson made the statement during the course of his appearance before the legislative committee on Judiciary in behalf of the bill to give the Department of Public Utilities the right to summons witnesses and to place them under oath on the rate cases of gas and electric corporations. "The committee of the City Council went to Detroit, Cleveland, Columbus, Milwaukee, Buffalo, New York and Chicago to study municipal lighting plants," he said. "One of us myself started out radically in favor of public ownership. These others favored the principle, but were, perhaps, lukewarm. At least one was opposed."

"We came back unanimously in favor of public ownership of the lighting plants. Even the conservative members from the back bay now believe in it."

TO TAKE FIRST STEP. Watson will take the first step toward public ownership. I feel that the vote will be unanimous."

President Watson later said that he would for the present refuse to say whether the vote will be in favor of the taking over of the Edison Electric Illuminating Company or the establishment of an independent plant by the city itself.

The City Council of Boston became seriously interested in the lighting situation, he said, when the Edison and the other corporations were discovered at the State House last year and their schemes to considerably smaller scale than this year's, and everyone is now taking such an interest in these affairs of the city that they promise to become accepted and accepted as a permanent fixture. The Edison and Chisel clubs members of the city of Boston and the Boston American to force down the rate for benefit of the 140,000 customers of the Edison.

He said the city has appropriated \$75,000 for that crusade and the case is being tried well against the Edison and that the Department of Public Utilities is continuing to hold the Edison and its lack of power to summons the officials in connection and to place them under oath.

LACK OF AUTHORITY. Commissioner David A. Ellis of the Department of Public Utilities described the scene the other day when Louis H. Watts, superintendent of sales of the Edison, was being examined by Attorney Grenville S. MacFarland of the Boston American. He was ordered by the lawyer of the Edison not to answer a certain pertinent question.

"A critical situation was reached," said Commissioner Ellis. "The witness was instructed not to answer, but the department felt that he should answer, but had no authority to force an answer. The counsel for the company finally decided that he had taken an unwise course and ordered the answer to be made, but that situation shows how helpless the department is at the moment."

Representative Coleman Shattuck of the Department of Public Utilities said that public relations of public utilities fall utterly when the corporations decline to give facts which the regulating authorities are entitled to have.

RETAIL STORES PLAY FAIR, SAYS WRIGLEY

Retail merchants play fair with their customers, despite the charges made by government officials, declared Maurice Wrigley, treasurer of Jordan Marsh Company, speaking to a crowd of more than 200 representatives of various concerns gathered in the Feltow Workers' restaurant of the city.

MONUMENT MEN HER TALK ON ADVERTISING

The value of advertising was stressed by William M. Alden, addressing a meeting of the Monument Dealers Association of New England, who are holding a three-day convention at the American House, J. Frank de Chant of the Shelburne School and Burdett Business College told the delegates that "the man who seeks only profits never makes a real success of business."

BETTY ALDEN'S COMMENT ON SOCIETY
Brush and Chisel Dance Attracts Youth of Smart Set

By BETTY ALDEN.

THE dance tonight of the Brush and Chisel Club promises to be the move for the younger members of society who have fallen victims to the lure of painting and sculpture.

The event, which has been planned by both active and associate members of the club, will be staged in the form of a subscription costume party, at Whitney Hall, Coolidge Corner. The patronesses have been chosen from the list of associate members of the organization, the list including Madame Dukes Ames, President Hattie Adams Cross, Mrs. William R. Eaton, Henry C. Everett, George H. Fearing, Curtis Guild, John Lavallo, David M. Little, Jr., Vittorio Orlandini, Ernest T. Paine, Howard M. Rollins, Quincy A. Shaw, Jr., Ezra R. Thayer, Walter Tufts and Frederick S. Walcott.

The ushers have been selected from the active and associate members. Howard Elliott's orchestra will provide the music. The Brush and Chisel Club is an organization of younger Boston artists, having an active membership of about thirty young men and women, not a few of whose members are the sons and daughters of the social register. John Lavallo of Marlboro street, a Harvard, '18, man, is president of the club.

Naturally the club has several prominent artists upon its honorary membership roll. In this group are the famous John Barrett, Mr. and Mrs. Philip L. Hale, Frank Benson, Charles W. Wood, William M. Patton, Lester Thompson and several others.

The dance which the club gave last year was such a success that the event's affair is equally successful, a much larger one will be given next year. The club and its corporation were discovered at the State House last year and their schemes to considerably smaller scale than this year's, and everyone is now taking such an interest in these affairs of the city that they promise to become accepted and accepted as a permanent fixture.

Brush and Chisel members of the city of Boston and the Boston American to force down the rate for benefit of the 140,000 customers of the Edison.

Adopted of several honorary members of the Brush and Chisel Club, the new has just come from Washington, D. C., where it was the subject of a painting. "Girl Arranging Flowers" by the artist, offered by the Curator of the Corcoran gallery in the capital.

Gallery visitors also voted heavily for paintings by two other Boston artists, Lillian Westcott Hale's "Mrs. Philip L. Hale" and "Portrait of Barbara" being accepted second place and Arthur P. Bower's "The Piano" being accepted third place.

The Army and Navy Club held last evening at the East State Armory brought out a large gathering of the smart set. The dinner commenced at 10 o'clock, and there were a group of more than thirty who had been invited to the exhibition of the art of the army, marine corps in charge of Commander D. W. Hamilton, U. S. A., and Captain John H. H. H. H.

Miss Andrea Becker was chairman of the entertainment of the dinner. The guests of honor were Mr. and Mrs. John Lavallo, Mr. and Mrs. Philip L. Hale, Mr. and Mrs. William P. Weston.

Among those who had boxes for the occasion were Mrs. John Lavallo, Mr. and Mrs. Philip L. Hale, Mr. and Mrs. William P. Weston, Mr. and Mrs. John Lavallo, Mr. and Mrs. Philip L. Hale, Mr. and Mrs. William P. Weston.

Mrs. John Lavallo (Ellen Tufts) of Marlboro street, who is one of the patronesses for the dance to be given this evening by the Brush and Chisel Club. John Lavallo, her husband, a Harvard, '18, man, is president of the club.

Random Notes of Society Folk in Town and Country

Mrs. John Lavallo

Random Notes of Society Folk in Town and Country

Mr. and Mrs. George W. Weston

The Minister of Sweden, Sir Nelson Morris, and Mrs. Morris, have sailed for Europe aboard the Paris of the French line. Mrs. Morris has been living in Boston this Fall and Winter, has shown particular interest in the Army and Navy Club, where she has been a constant worker. The Morris have bought a beautiful estate at Manchester in the North Shire, where they spent the past summer. Stating on the same boat with them are Charles L. Kagey, Minister to Finland, and Prince Boarn de Chalais, minister of the French embassy.

Vis-à-vis the dinner guests of Dr. and Mrs. Potter Palmer, who are staying at the Hotel Lafayette at the capital. Mrs. Coolidge provided over the weekly luncheon of the Ladies of the Senate.

Mrs. J. Montgomery Sears of Arlington street is among the Bostonians arriving in New York, where she is registered at the Hotel Carlton. At the same hotel are Mr. and Mrs. Charles Tarnal and Mr. and Mrs. George McFarland of Philadelphia. Mrs. Sears is a member of the Colony Club of New York, as well as of the Club of the City of Boston.

Hen Show at Milford

Milford, Jan. 19.—The Milford Poultry Association today concludes the first hen show it has held for five years. Today was exhibitors' day and tonight there will be a hen show in contrast, with an auction of birds.

MEDICAL REPORTS
FOR THE
LEGISLATURE
CONGRESS WILL BE ASKED TO AUTHORIZE NETWORK OF DISPENSARIES

By International News Service. Washington, Jan. 19.—The findings of a network of government medical depots across the continent at a cost of \$1,000,000 for the treatment of wounded veterans in their home towns will be recommended to Congress by Director Forbes of the Veterans Bureau. It was learned today.

The program, which is the largest of its nature ever undertaken by the government, will be included in the establishment of sixty-two new depots across the country, with new equipment for seventy-seven others. It will add an army of 1,000 men to the Veterans Bureau.

The plan, Director Forbes said, will solve the treatment of wounded veterans. The need of food, medical depots, he said, has been one of the bureau's most serious problems to date.

One new Class A depot will be established at Kansas City at an estimated cost of \$145,000. With all other Class A depots, it will carry 1,000 worth of drugs in stock. Ten other Class A depots will be on long term of service in stock. These depots with the appropriate equipment will be established at Pittsburgh, \$135,000; New Orleans, \$135,000; Cincinnati, \$100,000; Detroit, \$100,000; Minneapolis, \$115,000; St. Paul, \$100,000; Seattle, \$100,000; Los Angeles, \$100,000; San Francisco, \$100,000.

No change in the Class A depots is contemplated in the Class A depots in Iowa, New York, Washington, Illinois, Alaska, Oregon, and California. Six new Class B depots, however, will be established in Dallas, Rochester, Albany, Portland, Oregon, and San Francisco. They will have \$14,125 worth of new equipment, appropriations of about \$9,000 each for food, drugs and drug stock of \$2,000.

In the First District, six new Class C depots will be established at New Bedford, Worcester and New Bedford, Mass., and Manchester, N. H. In the Second District, six new Class C depots will be established in Hartford and New Haven, Conn., N. Y., and Birmingham, Poughkeepsie and Utica, N. Y.

MARKET DULL, COMPANIES
SUSPEND COAL MINING

Hazleton, Pa., Jan. 19.—The Lehigh Valley Coal Company will suspend operations in the Lehigh Valley, Northumberland and Columbia fields tonight for the balance of the week because of the lack of coal. More than 2,000 men will be out of work. The Lehigh Valley Coal Company, the largest anthracite producer in the East, has suspended operations today because of unsatisfactory market conditions, and 1,000 men were thrown out of employment.

SALES MAN ASKS
MAYOR TO FIND
HIM A WIFE

Alexander Hamilton Descendant Says He Is Lonely and in Financial Straits

From J. E. West, a traveling salesman of Peoria, Ill., who claims to be a descendant of Alexander Hamilton, Mayor Peters today received a letter asking for aid in finding a wife.

The letter stated that the writer was not only a traveling salesman, but was "a good one." He further stated he was fifty-eight years old, six feet tall, two pounds in weight and had dark hair and eyes. He was a native of New York, and had been a member of the Hamilton family for many years.

"I have had a splendid business education," he wrote, "but a six months' illness, followed by the national business depression, has about put me on the rocks. My life has been a lonely one. No one cares what becomes of me. Nowhere to go in case of illness or accident. I have never sought anywhere long enough to make any close friends."

"I long for a home and a wife to care for. I am a direct descendant of Alexander Hamilton and have excellent references. I thought perhaps you would be able to find me a suitable woman who has a business education, and is a native of New York, and who is a member of the Hamilton family."

Ship Scrapping a Big Gamble in "Junk," Says Buyer

By Associated Press. Philadelphia, Jan. 19.—Scrapping battleships is a gamble commercially, according to an official of the Henry A. Hiltner Ship Company of Philadelphia, which this week was awarded contracts for the purchase of six of nine battleships sold by the Navy Department.

"In the first place," the official said, "it must be remembered that no battleship has ever been scrapped in this country. I haven't the least idea what price we will make on this venture."

Armored plates, ranging in thickness from four to thirteen inches, he said, can probably be sold to automobile manufacturers. The machinery, piping, tubes and non-ferrous metals, much of which is brass and copper, will be melted down. The steel may be used to make out into short lengths and sent to foundries.

CITY PUTS GAS
MERGER UP TO
STATE BOARD

Lyons, at Hearing, Says Boston Has Been Unable to Investigate Proposed Move

Dismissing all responsibility in the matter, the city of Boston today placed the decision of allowing the proposed \$100,000 merger of the Boston Consolidated Gas Company, the Boston Gas Company and the Newton and Watertown Gas Companies solely up to the State Department of Public Utilities.

At the public hearing before the department, Assistant Corporation Counsel Joseph P. Lyons said that the city has been unable to investigate the proposed merger because of the best interests of the people.

When asked by the corporation what the shareholders of the two minor companies had agreed to do in the merger, Lyons replied: "It is rather singular that shareholders of the East Boston and Newton and Watertown should consent to a consolidation which under a consolidation will be less than they now charge."

Our Expectations Are Fulfilled
January Sale Continues

The rapid growth of our business justified our providing for the biggest January's business in our history. We are supplied with ample special values procured from our regular sources presenting the most unusual items to date.

We cite a few below:

AUTOIST SPEEDS AWAY

AFTER HITTING WOMAN

Attleboro, Jan. 18.—An unknown autoist ran down Mrs. Herbert Ballou of No. 87 Pleasant street at the corner of Park and Pleasant streets, and as a result, Mrs. Ballou is in the Sturdy Memorial Hospital with a broken left ankle, multiple bruises, and internal injuries. The autoist is said to have been traveling at a high rate of speed, and to have continued his trip toward Taunton without making his identity known.

RAISES EVIDENCE THAT HE WAS IN THE AUTO WHEN HE HIT MRS. BALLOU—AFTER.

ONE-MAN CAR HITS

TRUCK, HURTS DRIVER

Attleboro, Jan. 18.—A municipally-owned Norton, Taunton & Attleboro Railway Company electric car struck a truck driven by Frank Perry at the corner of Perry avenue and Pleasant street, smashing the truck and injuring the driver severely. Operator Fabulous of the one-man car said that Perry drove across the tracks from a side street. Perry was taken home and later removed to the Sturdy Memorial Hospital with facial lacerations and internal injuries.

POLICE AND U.S. AGENTS UNITE IN DRUG DRIVE

Superintendent Crowley Confers With Chief of Federal Narcotic Bureau

United efforts are to be made between the federal narcotic officers and the police of Boston to stamp out the fast-growing drug traffic here, following the Boston American's exposure of the appalling magnitude of the "dope" scourge.

Edwin U. Crowley, police commissioner of Boston, issued the following statement today:

"The Boston American is doing a valuable service by pointing out the alarming proportions of the drug evil. The illicit drug traffic is a serious problem, and the Boston American is helping the police curb the evil by pointing out the extensive effects of narcotics on persons."

Michael H. Crowley, superintendent of the Boston police, held a long conference with Dr. Edwin C. Bush, chief of the narcotic division of the Internal Revenue Department, on ways and means whereby the federal and local authorities could cooperate in curbing the drug traffic.

WORKING OUT PROGRAM

Following the conference, both announced that a system of exchanging information on "dope" peddlers is being worked out.

"The operations of the Federal Narcotic department spread all over the United States and in other countries," said Dr. Bush, "and many times with valuable information as to the illicit movement of narcotics and its sale to dope peddlers. By the same token the police of Boston come across in solving an interstate or international 'dope' ring. This information we propose to exchange on a regular basis from here on."

"The illicit drug traffic has grown in such alarming proportions that only by united efforts between all authorities charged with enforcing the law can the most effective work be done. I am glad to see the Boston police are alive to this menace."

ADVOCATES JAIL TERMS

Superintendent Crowley expressed similar views. "The bill introduced by Representative Wragg in the House," he said, "is a good one. It is a good one."

The Wragg measure, which has the support of the Boston American, has been referred to the Committee on Prisons and Penitentiaries in the House.

Police Superintendent Who Plans War on Drug Pedlars

MICHAEL H. CROWLEY

habit-forming drugs, has been referred to the committee, a date will be set for a hearing.

SUES SOUTH SEAS COMPANY FOR \$100,000

Former Naval Officer Declares Amount Due Him for Option He Obtained

Lowell, Jan. 18.—Additional details of the South Sea commercial romance told by former Lieutenant Commander Howard R. Kepp, U. S. N., of this city, in his suit for \$100,000 against the South Sea and Pacific Development Company, came to light at the trial of the suit before Judge Callahan in the District N. Y. Superior Court.

Kepp claims the money is due him as he claims in the negotiation of the South Sea company, an option on which he says he had obtained personally from an island princess.

Kepp graduated from the Naval Academy in 1911, and in 1918, he went west to attempt to study the copper trade with a view of divorcing the German control traffic to the United States. He claims that he obtained a concession from the island princess and claims that he obtained a concession from the island princess and claims that he obtained a concession from the island princess.

PERFECT MICROSCOPIC COTTON FIBRE TEST

Providence, R. I., Jan. 18.—Cotton fibres can be sized into sections less than one five-hundredths of an inch thick for microscopic examination and photographing under a system perfected by Professor Walter H. Smith and N. O. Howard of the botany department of Brown University.

RELIEVES HEADACHE

A little Musteroke rubbed on forehead and temples will usually drive away headache. A clean, white ointment made with oil of mustard. Musteroke is a natural remedy with none of the evil after-effects so often caused by artificial medicines.

Get Musteroke at your drug store and rub it on your forehead and temples.

MUSTEROKE

Vose Small Grand

BOY OF 17, INFATUATED WITH NEIGHBOR'S WIFE, KILLS HUSBAND

MONKEY BUSINESS HERE! But that's just what makes this Paret model, of chartrouse broadcloth, trimmed with black and white monkey fur, one of the oddest and smartest from the French capital. This exclusive model has just reached America.

BARONESS VON COLTZEHEIM, internationally known figure, is suing her husband, first cousin to Field Marshal Von Der Goltz, for a divorce on a charge of improper conduct. (International.)

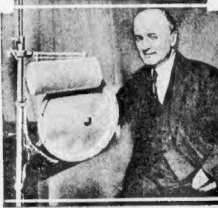

BISHOP WILLIAM M. BROWN of Ohio, who will fight to the bitter end the charges of heresy brought against him by the Episcopal House of Bishops. Bishop Brown doesn't believe Christ ever lived, and he isn't afraid to say so.

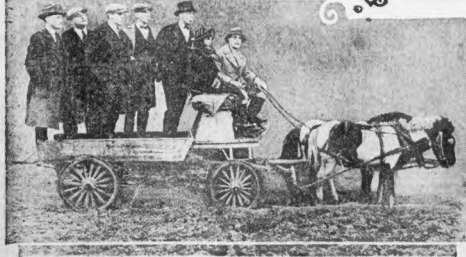

THIS IS "HOW SHE GETS THAT WAY!" Miss Gladys Lindsey, an instructor at the Miami Beach Athletic Club, was selected as the most nearly perfect girl in the South. Her recipe is exercise, and here we see her tossing a 25-pound medicine ball about a bit. This picture should really have been captioned, "Cause and effect." (Underwood.)

WATCH OUT FOR A NEW CONTEST! It'll start just as soon as the Pretty Mortarists quit. You'll be surprised! Here is Mrs. May J. Hovers, Clapp street, Malden, today's winner. A check for \$5 will be mailed to her. We still have a lot of photos to return, so be patient!

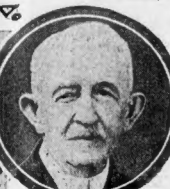

JOE TELLS THE WORLD! Joseph P. Tumulty, former secretary to ex-President Wilson, is here shown giving his experiences as secretary to Mr. Wilson over the microphone (wireless phone) to an audience estimated at 250,000.

BETTER GET OFF AND PUT THE PONIES IN THE CART! This "big league pony express" is composed of baseball and football players and George Walsh, movie highlight, who played host to the Washington and Jefferson pickup chasers at Universal City following their big game with the University of California. The sturdy little ponies could easily have hauled this group—but they didn't, or wouldn't. Watch it in the front seat with the reins and beside him is Mrs. Earl Neal, wife of W. & J.'s football coach. Can you pick out the rest? (Wide World.)

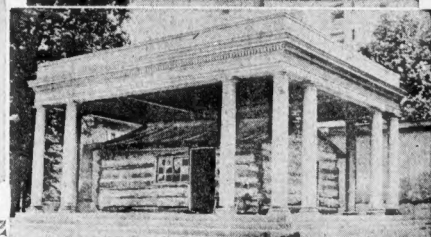

WHETHER IT'S BREAKING INTO SOCIETY OR ICE—There's a Certain Amount of Danger Attached to the Business! This new safety device to rescue skaters is portable and can be rushed from one end of the ice to the other. The ladder is pushed into the water and the involuntary bather grabs one and swallows it. No danger of ice breaking under it. Snapped in Prospect Park, Brooklyn. (International.)

GEORGE W. EVANS, Division chief, Interior Department, Washington, is the only living Federal employee who was appointed by President Lincoln. He has been in the government service for 57 years.

A BLOOMING GOOD SKIRT! Some skirts are a nuisance, literally speaking, and so it remained with Miss Ida Schall, champion all-around woman athlete, to invent a sport costume for all occasions. Just unstrap the skirt and, lo! bloomers are with us. Ideal for skating, she says. (International.)

UTAH'S oldest house, photographed from every angle and rebuilt under the pagoda to preserve it. Was first built in 1847 and now rests in Salt Lake City. Nearly every visitor sees this famous landmark. (Photogram.)

OSCAR HIMSELF! Although he isn't the Oscar we refer to quite often, he is just as interesting. Oscar Mathieson of Norway, international speed skating champion, is due here for a series of special races. Bobby McLean, Norval Bapiro and Edward Lampy are a few of his American rivals. (P. & A.)

LOVE OR A DISEASED MIND? Henry Heuser, 17 years old, who became an infatuated with the woman living next door that he killed her husband. The murder occurred at Richmond, Cal. He says he has no regrets for his crime. The woman was old enough to be his mother. (International.)

NATURE'S JEST! "Taurus," a legless calf, is owned by A. N. Early of Los Angeles, and this photo of him was taken at the age of 6 weeks. (Keystone.)

YOU CAN BET THERE'S NO ICE TRUST HERE! With the return of practically all of our American doughboys from Russia, they brought with them experiences greater than riches. Some of these experiences weren't exactly nice in a lady finger way, but they made men of mere boys. The photograph above shows native of Vladivostok, Siberia, cutting ice, to get a drink of water because it is so cold there that this stream, on the outskirts of the city, FROZE CLEAR THROUGH TO THE BOTTOM. This picture was brought back to America by Joseph F. McGovern of 81 North St., Newton Centre, a doughboy who served for months in Russia.

A PRESSING ENGAGEMENT! Remember the Hallroom Boys that used to disappear on the comic pages of the Boston Area press? Well, here's an improvement on one of their ideas. They used to press their trousers by laying them between the mattress and spring of their bed. But this photo shows the latest thing in pants presses, combining two useful household articles—chair and presser. Very popular in England just now, where it was invented. (International.)

ONE WAY OF WASTING WORDS IS TRYING TO EXPLAIN A MISTAKE

HUTCHISON TO DEFEND BRITISH GOLF TITLE IN ENGLISH MATCH

By Jack Hutchison

If all goes well, I intend to return to England and defend the British open championship. The tournament will be played this year at Sandown, a course that I have many years ago and one that ought to be a hard test for the game.

I do not think it will be much of a handicap as the British open has been. The course is a good one, and I think I shall be able to play it well.

There were many in the tournament, but I was not one of them. I was not in the tournament, but I was not in the tournament.

LOWELL FAILS TO SEE NEED OF FOOTBALL

Necessity of Maintaining Public Spectacle is Not Clear, Harvard Head Says

But in view of football has been a great success in the past, and it is not clear that it is necessary to maintain it. The necessity of maintaining it is not clear, and it is not clear that it is necessary to maintain it.

The necessity of maintaining it is not clear, and it is not clear that it is necessary to maintain it. The necessity of maintaining it is not clear, and it is not clear that it is necessary to maintain it.

The necessity of maintaining it is not clear, and it is not clear that it is necessary to maintain it. The necessity of maintaining it is not clear, and it is not clear that it is necessary to maintain it.

FINANCE AND BUSINESS

By B. C. FORBES

Instead of reading a column by me today, you will be more interested in reading the following, written for this column by one of America's ablest international bankers, a recognized authority on foreign exchange, who has lived for years in Europe and is thoroughly familiar with conditions there. His writing:

Since November, 1918, more than three long years, have the statements of Europe tried to make who out of water. Instead of creating ease of water, they have created more water every day.

First, all governments continued spending money which they were not earning, mostly on armaments. Europe, which could not be balanced by revenues were balanced by 1 1/2 % of the prospective governments by floating treasury bills, which had to be bought (or sold) by the government. The central banks. These central banks, in order to help the governments, printed proceeds of such treasury bills, printed paper money which was pushed into the hands of the people. The unsecured paper money in circulation, which was not backed by gold, increased, and the price of gold increased, which is only another way of saying that the value of the paper money for a decrease in the buying power of such watered paper money.

While the watered paper money, franc, mark, crown, rouble, etc., decreased in value, the value of these currencies decreased also in value in the United States. These "exchanges" were offered in exchange for dollars. The rise in the value of the dollar was caused by the fact that Europe bought more from the United States than it sold to the United States. If this state of affairs were to continue, the European exchange would go on depreciating in the United States. The dollar would be worth as the Austrian crown, the Polish mark, the Russian rouble, etc. In other words, the European currencies would decline to nothing, and no one would want them. They would be worth as much as a dollar's worth of American goods, as they simply could not pay up.

It therefore follows that Europe must—fundamentally—become prosperous again before she can again think of buying heavily from America. But Europe needs foodstuffs, which America has so far supplied. Therefore—if America cannot sell Europe more because the dollar has no money value enough to serve as a medium of exchange—she must obtain dollars—Europe must raise her foodstuffs from America.

Before the war Russia and the Danubian countries largely supplied Europe with grain. The war stopped this. And now Russia must again take up the importation of grain. Europe must buy in countries with CEREAL exchanges, such as Russia, before it can again think of buying from countries with DEAR exchanges, such as America. The United States, etc.

The Bolsheviks ruined Russia, but no impartial observer can believe the Allies from having added to that which they had done. The Allies have recourse to an open exchange with Russia.

To make a seemingly involved problem appear as one only of a few lines to consider this. The Bolsheviks abolished capitalism. They abolished work for nothing. Formerly the Russian peasant was paid for the grain he raised. Now the grain is confiscated. This induced the Russian peasant to stop growing grain for his own needs; he was not sufficiently imbued with Bolshevism. He refused to raise grain without compensation for the entire crop. The rest of the country, to supply the need of the country, to supply the need of grain for export.

It is true that Lenin is again introducing capitalism in Russia. The Russian peasant will again grow enough for the entire country and for the rest of Europe. Common sense tells us that the payment for services rendered, the incentive for gain will again assert itself, especially if the money received is "good" money and can buy the many, many things which the peasant needs. These things would be furnished by the industries of the countries buying the Russian grain.

The moment the impetuous countries of Europe could buy grain from Russia they would naturally stop buying Argentina and America grain and consequently, the hunger for Argentina and America grain would subside.

That Russia should again raise large crops for export is absolutely necessary for another important reason. Suppose there should be a crop failure in Argentina, Canada or the United States, what then? The world could not afford to pay for this. It has played with the long enough.

Stocks Rule Lower in New York

GOVERNMENT BONDS UP

LAST HOUR

Genial Rise of This Steel Is the Feature of an Active Market

By W. H. BROS

Financial Editor

Prices ruled lower on the New York stock market from the opening until the close but the following range:

Stocks: Open 100.00, High 100.00, Low 99.00, Close 99.00.

Bonds: Open 100.00, High 100.00, Low 99.00, Close 99.00.

The market trend developed during the morning and it was irregular at first. The market was active in the afternoon. The market was active in the afternoon. The market was active in the afternoon.

While the watered paper money, franc, mark, crown, rouble, etc., decreased in value, the value of these currencies decreased also in value in the United States. These "exchanges" were offered in exchange for dollars. The rise in the value of the dollar was caused by the fact that Europe bought more from the United States than it sold to the United States.

Before the war Russia and the Danubian countries largely supplied Europe with grain. The war stopped this. And now Russia must again take up the importation of grain. Europe must buy in countries with CEREAL exchanges, such as Russia, before it can again think of buying from countries with DEAR exchanges, such as America.

The Bolsheviks ruined Russia, but no impartial observer can believe the Allies from having added to that which they had done. The Allies have recourse to an open exchange with Russia.

To make a seemingly involved problem appear as one only of a few lines to consider this. The Bolsheviks abolished capitalism. They abolished work for nothing. Formerly the Russian peasant was paid for the grain he raised. Now the grain is confiscated. This induced the Russian peasant to stop growing grain for his own needs; he was not sufficiently imbued with Bolshevism.

It is true that Lenin is again introducing capitalism in Russia. The Russian peasant will again grow enough for the entire country and for the rest of Europe. Common sense tells us that the payment for services rendered, the incentive for gain will again assert itself, especially if the money received is "good" money and can buy the many, many things which the peasant needs.

That Russia should again raise large crops for export is absolutely necessary for another important reason. Suppose there should be a crop failure in Argentina, Canada or the United States, what then? The world could not afford to pay for this. It has played with the long enough.

The moment the impetuous countries of Europe could buy grain from Russia they would naturally stop buying Argentina and America grain and consequently, the hunger for Argentina and America grain would subside.

That Russia should again raise large crops for export is absolutely necessary for another important reason. Suppose there should be a crop failure in Argentina, Canada or the United States, what then? The world could not afford to pay for this. It has played with the long enough.

Some Great Sons of Great Fathers, Yes

But It Happens Rarely, Perhaps Fortunately
Copyright, 1922, Rex Company

When Man-o-War, A HORSE, wins races with great ease they take him from the track and he with a gigantic price as a FATHER instead of a racehorse.

Men that want good racers pay enormous sums for a colt "by Man-o-War," and there is not only possibility but great probability that a colt with such a father will make a great racer.

Not so with two-legged fathers that struggle with the problems of earth, from breeding good racehorses to developing a better civilization.

Among men, the great man comes from nowhere and from no father in particular.

Abraham Lincoln was the son of an unsuccessful man not able to have a floor or a window to the cottage in which his son was born.

And the great Napoleon, assuming that his father was the supposed father, and not the French general who paid Napoleon's expenses at the military school, was the son of an unimportant person.

This has often been pointed out. Now comes a letter on the other side, from J. D. Massey, vice-president of the Eagle and Phoenix Mills, of Columbus, Georgia.

Dear Sir:

I read with interest the column "Fate" in the Atlanta Georgian, about the few famous sons of famous fathers.

There is no disputing the correctness of your view as a general proposition. However, there are, I think, some exceptions in addition to those which you name.

For instance, the Emperor Titus, despite the hostility of his father, got to be a successful general, and, as you recall, was the man who prosecuted the siege of Jerusalem, among other military enterprises.

Hannibal was really far greater, in my opinion, than his father. And, while he was a playwright, instead of a novelist (although he did write some novels), the younger Dumas was considered a man of unusual talent.

Another military instance is Alexander the Great.

Alexander was the son of a good fighting father and King. But without Alexander you would hear little of Philip, and no Macedonian King would have conquered Persia and nearly all the world.

Here and there an able man has an able son, which must happen, since there are millions of able men, and the question of greatness depends largely on opportunity, circumstances, or what seems to be chance.

Napoleon said, as he stood at the grave of Rousseau, that if there had been no Rousseau there would have been no French revolution and therefore no Napoleon.

The rarity of great fathers with great sons is also due to this fact. Men get their best qualities from their MOTHERS. The chances are of course a million to one that the great father will not marry the really great woman, and that gives the son less of a chance.

It is fortunate for the world that great fathers do not have great sons as a rule, but on the contrary, average or less than average sons, amounting to little or nothing.

If the great white man had always a son as powerful as himself, the world would be dominated by a super-race. And we should have a condition as bad as in Swift's famous description of the island inhabited by the Hottentots in which the human beings were Yahoos, ruled by a superior four-footed race.

If great fathers bred great sons regularly, a million men would easily rule the fifteen hundred millions on this earth, and reduce them to slavery.

Thrift Week

Honor Old Franklin. Push Yourself Ahead
Copyright, 1922, Rex Company

This is "Thrift Week" in eighty American cities. This week is selected in honor of Franklin, who began his work as an editor 200 years ago.

It should be remembered, told to children and especially to business men that thrift does not mean BURYING money, or HIDING it away anywhere. It means CREATING something, increasing value. It means especially thrift in the use of time, of physical and mental strength. TO SPEND wisely is as important a part of thrift as SAVING wisely. Nothing is less thrifty than mere hoarding.

Live thrifflily, but LIVE. You won't come back in this body any more. Use your money wisely, but USE IT.

In some places they will fly a kite like the kite with which Franklin taught the world that lightning could be brought down from the clouds. That was a wonderful lesson, for the lightning, brought down for a second, as an interesting demonstration of what could be done, has now been brought down to stay as man's most useful servant—ELECTRICITY.

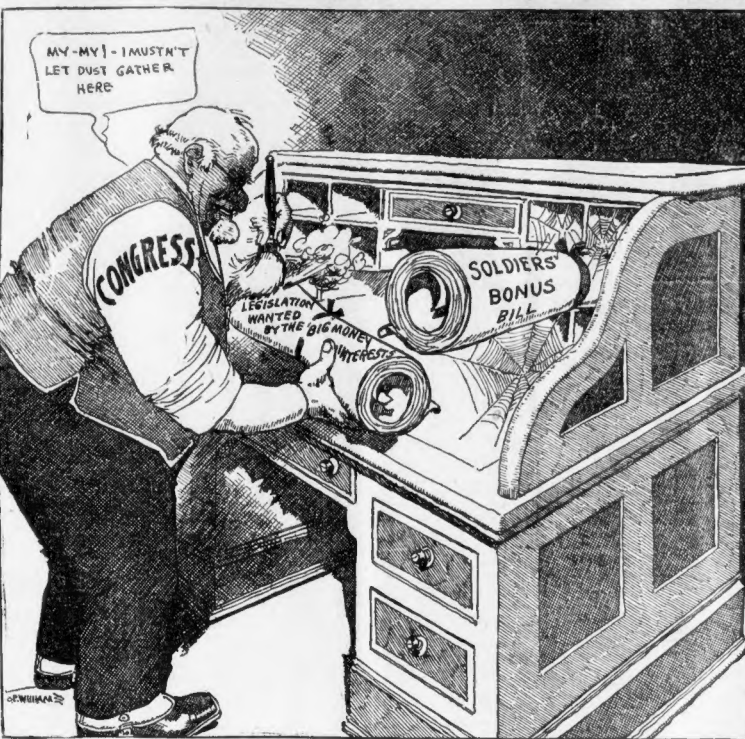

It is too late to do anything by using Franklin's kite. But Franklin's ideas on thrift are as good as ever. Use those ideas and you can bring down to yourself, through wise and real thrift, a power that will take you safely through your old age and all your worries.

The inhabitants of this country took out EIGHT THOUSAND FIVE HUNDRED MILLION dollars' worth of new life insurance last year. That is a sensible kind of thrift if you select the right company. The misfortune is that men are allowed to borrow and companies are COMPELLED in many States to lend an empty shell.

The right kind of an insurance policy is the best aid to thrift. The holder knows that he has secured those that depend upon him, and he can work undisturbed by worry, can undertake new enterprises, courageously, which is the highest kind of thrift.

Whoever talks or preaches on thrift should begin with the parable of the servants of whom one put his talent in a napkin and buried it. That wasn't thrift, it was sulky ignorance.

Not So Particular in Some Parts of His Desk

SERVISS ON EARTH'S LUNAR ASPECT

"Man in the Moon" Sees an Orb That Pales the Lustre of the Stars, a Beautiful Globe of Many Colors, Says Famous Scientist.

By Garrett P. Serviss,
Noted Astronomer and Writer on
Subjects of Scientific Interest.

"O work with the color of fancy, and that is the great charm of it. So, I want to ask you to describe how this earth of ours looks, as seen from the moon or from very far away. Is she not very beautiful, and is she blue or green? I think blue, like sapphires—A. P. Lillie, Reader, San Diego, Cal."

I admit that there are, or may be, inhabitants on other planets, or even if throwing analogies and probabilities to the winds we simply and purely imagine such inhabitants, their views and thoughts of us are as interesting to consider as ours of them. The moon is as near to us—no like a face peering into our windows—that everybody may sometimes share the sentiment of the little girl who, after gazing gravely and rather defiantly at the full moon, said: "Mother, what is the moon laughing at?"

To be critically shared at from foreign worlds by superior creatures armed with optical machinery of super-terrestrial power, would be a severe trial for a less irritable race than ours, and it is not pleasing to dwell upon Mr. Marconi's suggestion that the inhabitants of Mars may regard us with contempt because we make no response to their signals.

They, from their height of civilization, make very uncomplimentary remarks about our earth, and they are sure to be right.

appearance of our planet, so unlike the trained regularity that they have imposed upon their. Such things might be the germs of a real war of worlds if once their inhabitants could get the mastery of the interplanetary ether. First, mutual admiration; then rivalry; then battle—might not that be the story of interplanetary relations, as it has been the story of inter-racial relations on this particular phase?

Mr. R. A. Proctor, prince of amateur astronomers, once exercised his fancy about moon-views of the earth in a book which has now probably retired to the shelf, a treatise on "The Moon, Her Motions, Aspects, Scenery, and Physical Condition." His idea of the looks of the earth as seen from the moon are so vivid and probable, that I quote some of them in outline.

"The moon, as viewed with beautiful and well marked colors. At the border the light was white, while somewhat to the left of the uppermost point, and as much to the right of the lower, a white light of peculiar purity and brilliancy extended for some distance upon the disk. But whereas the upper passed farthest round the disk's edge, and seemed on the whole to be the most extensive, the lower spread farther into the disk and appeared rounded into an oval shape.

"The light," says Mr. Proctor, "on the moon was tinted with beautiful and well marked colors. At the border the light was white, while somewhat to the left of the uppermost point, and as much to the right of the lower, a white light of peculiar purity and brilliancy extended for some distance upon the disk. But whereas the upper passed farthest round the disk's edge, and seemed on the whole to be the most extensive, the lower spread farther into the disk and appeared rounded into an oval shape.

But whereas the upper passed farthest round the disk's edge, and seemed on the whole to be the most extensive, the lower spread farther into the disk and appeared rounded into an oval shape.

"The light," says Mr. Proctor, "on the moon was tinted with beautiful and well marked colors. At the border the light was white, while somewhat to the left of the uppermost point, and as much to the right of the lower, a white light of peculiar purity and brilliancy extended for some distance upon the disk. But whereas the upper passed farthest round the disk's edge, and seemed on the whole to be the most extensive, the lower spread farther into the disk and appeared rounded into an oval shape.

ash and yellowish streaks near the middle, while on the contrary the lower half of the disk was nearly free from misty light, and occupied on the sides by widely extended blue regions, and in the middle by green tints on a somewhat yellowish background. To an inhabitant of earth it would not have been difficult to recognize in this last-named region the continent of South America bathed in the full light of a Southern Summer sun."

Having given the hint about South America, Mr. Proctor did not think it needful to make further explanations, but it may, nevertheless, be well to point out that the "white light of peculiar purity" seen near the top of the earth's globe was the polar snowcap of the Northern Hemisphere, and the similar light at the bottom was the south polar snowcap.

Being November in the Northern Hemisphere, it would be our May season in the Southern, so that the Arctic snows would be spreading and the Antarctic receding. The blue patches and regions that he speaks of represent water areas, and the brown, yellow and green stand for the continental regions, with their variegated colors, changing both with the seasons. Upon the whole, there seems no reason to seriously dispute the assertion that such colors would be seen by the observer on the moon.

Even more fascinating would be the changing aspect of the earth as it slowly turned on its axis, revealing all its geographical features in succession, and the apparent drift of the starry heavens past upon the disk and appearing almost motionless in the sky.

DO YOU SUIT YOUR ACTION TO YOUR WORD?

By Dr. Charles Fleischer

WITH how many blanket phrases are you accustomed to cover your thought, as you attempt to hide it in speech?

Or are you one of those rare persons whose you say and mean the same thing, whose words fairly and truly represent your ideas?

Hannibal, instructing the Players who are to reach the consciousness of the King, tells them to suit the action to the word, the word to the action. Similarly, we ought to take pains in common speech to suit our words to our thoughts, so that what we say will perfectly express what we think.

Recently, we the people of the United States are supposed to have observed a Better Speech Week. Presumably, its purpose was to improve our language in current usage.

But the year is so full of a number of "Weeks" and "Days" for kind and noble purposes, from the abolition of cancer to the glorification of parents—that this particular request has probably escaped most of us, and is therefore still more honored in the breach than in the observance.

The intention, at any rate in the writer's mind, is not to do away with swearing and to slang, but to suggest the use of them only when they are really useful; and in general to ask for the cultivation of plain language which shall be the happy medium for vital thought.

Consequently, if you think poorly, you will speak poorly.

There are, of course, some remarkably successful window-dressers. They make an impressive showing, though the store itself hardly matches the display. So, there are plenty of persons who are "long" on words and "short" on ideas.

When I shall take for granted that most of us are as honest, intellectually, as the law of social intercourse demands. That means, then, that we really have something to say when we open our mouths to talk.

In that case, our speech should fitly represent our impulse to speak.

It is a curious notion that the King's English—or, rather, the President's American—is to be used only by public speakers, by professional writers, whereas, for private communication, colloquialisms are to be avoided, and you may be as slipshod and slangy and ungrammatical with your Americans as you please.

Correct language is not only a matter of personal pride, but it is also a matter of personal pride as the straight direction of your eyes for seeing the accurate report of your ears for hearing, and the servicable use of your lips for speaking.

In each case you are employing normal means to the end of attaining an object—giving your ears as perfect reporters, your eyes as accurate seers, and your language to complete the communication of your thought to the person with whom you are dealing.
